January, 2012

Isn't this a great time to be in the cattle business. The cattle markets have treated us well during 2011 and it looks good into 2012. The scary part is the bull market as we consider our bull needs into the next breeding season. Here at Earhart Farms we are offering 26 coming two year old bulls and 20 yearling bulls for sale by private treaty here at the farm. These bulls are bred and developed to provide you with genetics that will enhance the profitability of your program, and they are reasonably priced.

Bull sired by Protégé, Daybreak, Hoover Dam, Bextor, and Rito 9B30.

Our "Total Package" program has helped us to make progress toward our goal of a more profitable cattle enterprise.

PRODUCTION -- Every cow has alive calf to take to pasture, or she goes to town

PERFORMANCE -- Cattle with more growth potential produce more pounds of beef to sell. High growth cattle reach market weight in fewer days and that means less feed (more profit).

STRUCTURE -- We like cattle that are long bodied with thickness and of course good feet and legs.

CARCASS -- We select for cattle that are high in marbling. The ability to reach the choice grade with fewer days on feed, without excess fat and with adequate muscle. This produces a superior product and a more satisfying eating experience.

We also have bulls consigned to the WBCIA sale on April 7, and to the Northwest Wyoming Angus Association bull sale on March 27 in Riverton.

Call or E-mail us for more information. We would be happy to show you the bulls.
